Significant Risks for Investors

Investors in this Product should be experienced investors and familiar with both derivative products and the financial markets. Potential investors should understand the risks associated with an investment in the Product and shall only reach an investment decision after careful considerations with their legal, tax, financial and other advisors of (i) the suitability of an investment in the Product in the light of their own particular financial, fiscal and other circumstances (ii) the information set out in this document and (iii) the Underlying(s). In addition to the market risk with regard to the development of the Underlying, each investor bears the general risk that the financial situation of the Issuer could deteriorate ("**Issuer Risk**"). The Products constitute immediate, unsecured and unsubordinated obligations of the Issuer, which, particularly in case of insolvency of the Issuer, rank *pari passu* with each and all other current and future unsecured and unsubordinated obligations of the Issuer, with the exception of those that have priority due to mandatory statutory provisions. The general assessment of the Issuer's creditworthiness may affect the value of the Product. This assessment generally depends on the ratings assigned to the Issuer or its affiliated companies by rating agencies such as Moody's, Fitch and Standard & Poor's. The Issuer Rating indicated in this document reflects the situation at the time of issuance and may be subject to change. The actual Issuer Rating at any given time can be seen on the Issuer's website (www.ubs.com) under "Investor Relations".

In addition to the risk factors below, further risk factors are set out in the UBS Swiss Base Prospectus for the Issuance of Securities.

Product Specific Risks

Loss Potential	Warrants involve a high degree of risk, and investors should be aware that Warrants may under certain circumstances expire worthless. Therefore, investors can lose all of their initial investment.
Capital Protection (at Expiry)	None
Risk Potential in comparison to a direct investment in the Underlying	Warrants are leveraged products, which means that any change in the value of the Underlying(s) may result in a disproportionate change in the market value of (and expected return on) the Warrants. As a result, Warrants involve disproportionate loss exposure if the value of the Underlying(s) develops unfavourably. Investors in Warrants should realise that the greater the multiplier or leverage factor of a Warrant, the greater the loss exposure involved. An investment in Warrants therefore bears a higher risk than a direct investment in the Underlying(s). The Warrants may become worthless, while the Underlying(s) still has a value.
Issuer Call right	None
Knock-Out Event	None

Stop Loss Event	None
Exposure to the performance of the Underlying(s)	Investors in these Products should be familiar with the behaviour of the Underlying(s) and thoroughly understand how the performance of such Underlying(s) may affect payments (or any other benefits to be received) under, or the market value of, the Products. The past performance of the Underlying(s) is not indicative of future performance. The market value of a Product may be adversely affected by postponement or alternative provisions for the valuation of the level or the Underlying(s). There are significant risks in purchasing Products that are linked to one or more emerging market Underlying(s).
Unpredictable market value of the Products	The market value of, and expected return on, Products may be influenced by a number of factors, some or all of which may be unpredictable (and which may offset or magnify each other), such as (i) supply and demand for Products, (ii) the value and volatility of the Underlying(s), (iii) economic, financial, political and regulatory or judicial events that affect the Issuer, the Underlying(s) or financial markets generally, (iv) interest and yield rates in the market generally, (v) the time remaining until the Maturity Date, (vi) if applicable, the difference between the level of the Underlying(s) and the relevant threshold, (vii) the Issuer's creditworthiness and (viii) dividend payments on the Underlying(s), if any.
No recourse to Underlying(s)	The investors' only recourse in respect of the Product is to the Issuer. The Products do not represent a claim against the Underlying(s) and investors will not have any right of recourse to such Underlying(s) or to any other assets. An investment in the Product does not result in any voting rights in respect of, or receive distributions on, the Underlying(s).
Extraordinary termination risk	The Product contains terms and conditions that allow the Issuer to terminate and redeem the Product prior to the Maturity Date. Examples of extraordinary termination events may include the discontinuation of the determination/publication of the price of the Underlying(s), the occurrence of a hedging disruption or a change in law. In case of such extraordinary termination, the Issuer shall pay to the Investors an extraordinary termination amount as determined by the Calculation Agent which is usually equivalent to the market value of the Product. Potential Investors should note that the extraordinary termination amount may deviate from and may be considerably below the amount which would be payable pursuant to the final redemption provisions on the Maturity Date. Investors are not entitled to request any further payments on the Product after the termination date. For a detailed description of such events and their effects please refer to the Product Documentation.
Adjustment risk	Potential investors should be aware that it cannot be excluded that certain events occur or certain measures are taken (by parties other than the Issuer) in relation to the Underlying(s) which can lead to changes to the Underlying(s) or its concept (e.g. corporate events of a company whose shares constitute an Underlying, market disruption events or other circumstances affecting normal activities). In the case of the occurrence of such events or measures, the Issuer and/or the Calculation Agent are entitled to effect adjustments according to the Product Documentation. Such adjustments might have a negative impact on the value of the Product.
Illiquidity risk in secondary market	The Issuer or the Lead Manager, as applicable, intends, under normal market conditions, to provide bid and/or offer prices for this Product on a regular basis. However, the Issuer or the Lead Manager, as applicable, makes no firm commitment to provide liquidity by means of bid and/or offer prices for this Product, and assumes no legal obligation to quote any such prices or with respect to the level or determination of such prices. Potential investors therefore should not rely on the ability to sell this Product at a specific time or at a specific price. Potential investors should note that prices quoted typically include a spread and therefore may deviate from the market value of the Product. In special market situations, where the Issuer is completely unable to enter into hedging transactions, or where such transactions are very difficult to enter into, the spread between the bid and offer prices in the secondary market may be temporarily expanded, in order to limit the economic risks of the Issuer. Hence, investors might sell at a price considerably lower than the actual price of the Product at the time of its sale. By selling the Product in the secondary market investors may receive less than the capital invested. In case of a secondary market transaction, there is a possibility that costs, including taxes, related to or in connection with the Product may arise for investors that are not paid by the Issuer or imposed by the Issuer.
Market Disruption risk	Investors are exposed to market disruption events (such as trading disruption, exchange disruption and early closure of the relevant exchange), which could have an impact on the redemption amount through delay in payment, change in value or suspension of trading in the Product in the secondary market. For a detailed description of such events and their effects please refer to the Product Documentation.
Effects of structuring and product management	When the Product is issued or sold, several types of incidental costs, fees, commissions and a profit are included in the purchase price of the Product. Such incidental costs and fees may include (i) issuance and securitisation costs; (ii) hedging costs and brokerage fees

	incurred by the Issuer in connection with the issuance of the Product; (iii) a profit priced into the Issue Price for the benefit of the Issuer; (iv) commissions paid internally from one department to another department (e.g. sales department) of the Issuer; (v) distribution fees to intermediaries, brokers or other distributors and financial advisors; (vi) other costs incurred by the Issuer in connection with the issuance of the Product (including, without limitation, costs for external legal and tax advice). Such costs reduce the value of the Product in the sense that a potential bid price will exclude such costs and therefore is likely to be lower than the Issue Price or the price at which the Product was offered.
Withholding tax	Investors in this Product should note that any payment under this Product may be subject to withholding tax (such as, inter alia, Swiss Withholding Tax, and/or withholding related to FATCA or 871(m) of the US Tax Code). Any payments due under this Product are net of such tax. Please refer to the Product Documentation for detailed information. If the Issuer is required to withhold any amount pursuant to Section 871(m) or FATCA of the U.S. Tax Code, the Issuer will not be required to pay additional amounts with respect to the amount so withheld.
Tax Treatment for dividend payments on index components	Each investor should note that since this Product references an Index, then regardless of whether any such Index is a net price return, a price return or a total return index, the payments made by the Issuer under the Product will reflect the gross dividend payments paid by the issuers of the securities comprising the relevant Index less applicable withholding tax amounts in respect of such gross dividends. In the case of U.S. source dividends, these withholding tax amounts will be paid by or on behalf of the Issuer to the U.S. Internal Revenue Service in accordance with the U.S. withholding tax rules under Section 871(m).
